

It's reported that the Japs have spiked the Russian guns. It's a fact that we've spiked regular prices. We've cut out profits and on some articles the actual cost of manufacture. Our store is not a storehouse. We do not store goods away for next season. Before inventory we sell, clean up and clear out, and by these means we always have an interesting place for you to trade in.

Twenty per cent. discount on Winter Suits, Trousers and Overcoats. No old shopworn goods. All new and good style.

If any more samples of weather could be crowded into twenty-four hours we do not recall them just at present.

The number of people made glad by the Salvation Army last evening is a full reward for all the labor it cost.

It behooves Barre taxpayers who have not yet settled their tax accounts to do so before February 15. They will be powerless at the March meeting, if they don't.

As if Gen. Stoessel hadn't experienced his trials already, it is now reported that he may have to face trial by court martial.

SECURING NEW INDUSTRIES.

That the little city of Vergennes has secured a large industry at the expense of Richford is regrettable from the Richford point of view, no doubt. But on the other hand, the ancient city is to be congratulated for its activity. A party of business men there showed a public spiritedness that is unusual and worked unremittingly to secure the new industry. Now that their efforts have resulted successfully the remainder of Vergennes should shake itself from its lethargy and shout "Banzai," along with the Japanese. Vergennes is fortunate in having business men of that stamp who

are not everlastingly and constantly endeavoring to corner the last dollar for their personal acquisition, forgetting public interests entirely.

Just how the people of Vergennes went about the task of securing the new industry is told by Editor McCuen of the Vergennes Enterprise and Vermont-er, who was one of the committee:

"The opportunities, facilities and natural advantages at Vergennes afforded by the location of the city on the lower falls of Otter Creek, which produces one of the best water powers in New England, should be of great assistance to the growth and prosperity of the city. With all these great advantages nothing would have been accomplished without the work of the people. For many years the industrial conditions of the city have remained at a standstill and progress has been delayed solely by the inactivity of the people. The beginning of the new year finds a new spirit in existence and the people of Vergennes have manifested their intentions of building up their own municipality. Their plan is to organize small industries and start the business on a small scale, but by practical and conservative management they hope to produce a large and thriving business." There may be a lesson in co-operation right there for Barre people to learn.
